

## **OPERATIONAL FLOW ORDER (TGP)**

**Issued by:** New York State Electric & Gas Corporation  
**Date of Issuance:** April 7, 2025  
**Time of Issuance:** 8:15 AM Eastern Clock Time ("ECT")  
**Effective:** April 8, 2025, 10:00 AM ECT

As described in TGP Notice ID 394242, due to forecasted colder weather with associated greater demand, TGP is issuing an OFO Critical Day 1 for all areas East of Station 245 on the 200 line only, effective April 8, 2025, at 10:00 AM.

NYSEG, in support of TGP's notice, is requiring that ESCOs take the appropriate action to respond to TGP's OFO. NYSEG is requiring all TGP Pool Operators to keep actual daily takes out of the system less than or equal to scheduled quantities regardless of their cumulative imbalance position.

NYSEG is requiring all TGP Pool Operators to adhere to all pipeline requirements including any limitations imposed by the pipeline on nomination imbalance tolerances.

Any costs NYSEG incurs from pipeline imbalances will be passed on to the offending shippers.

This OFO will remain in effect until further notice.
